

Second edition of Bangalore Nano in December

Economy Bureau

Bangalore, Jul 16

Karnataka state government department of IT and biotechnology, will host the second edition of the nano technology event, "Bangalore Nano" from December 12-14 in Bangalore.

Launching the event, Ashok Kumar C Manoli, Karnataka Principal Secretary for information technology, biotechnology and science & technology, told the media that, "after becoming an information technology, biotechnology bell-wither, the state is now shifting its focus to nano technology. There is a lot of research and innovation done by small companies in India and the second Bangalore Nano will provide them a platform to showcase the emerging technologies and explore global

tie-ups."

The event, hosted in association with Jawaharlal Nehru Center for Advanced Scientific Research (JNCASR) and MM Activ Scitech Communications Company aimed to showcase the latest advancements in Indian nano technology and provide a platform for interaction between innovators, researchers, academia, entrepreneurs, venture capitalists and large business enterprises through its Research Industry Collaboration Hub (RICH).

The three-day event, which focussed on the impact of nano technology on the future of Indian industry, manufacturing, energy and environment, health and wellness, food and agriculture, electronics and chemicals, was expected to attract over 500 delegates from across the globe.
